

INSTALLATION INSTRUCTIONS

⚠ ATTENTION: Read the instructions prior to installation.

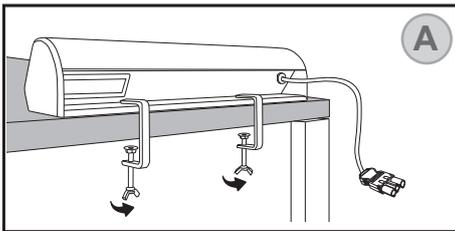

Components:

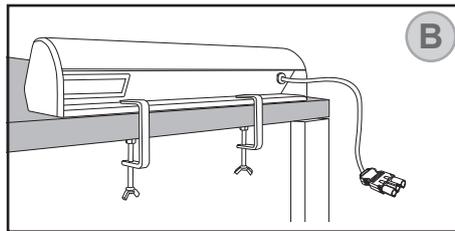

Critical safety information:

- Prior of use, please examine and verify that the product is not defected. Please do not install or operate if there is a defect of any kind.
- If in any case you are facing misunderstanding of installation procedure, the installation should be carried out by certified electrician
- Make sure you are installing the product on smooth straight surface. Do not install in any case that the surface is not straight or if there are levels differences.
- Make sure water will not penetrate into the unit. In any case please make sure you are installing the unit, where proper leakage protection device is connected.

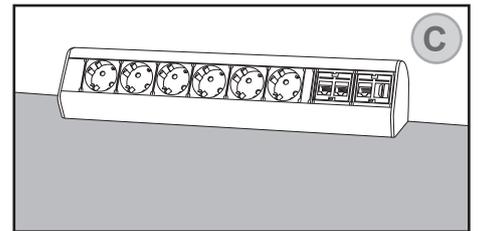

Surface mount installation (Base kit):

Locate the Exterio Vital on the edge of the desired surface. Assemble each locking hook with nut and screw together and tight them to the surface by turn them clockwise as in the illustration above.

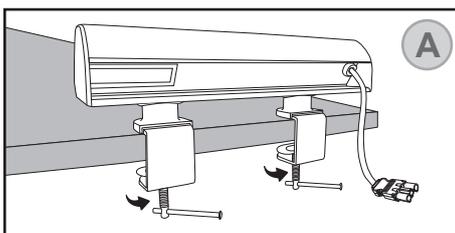

Make sure the locking hooks are tightened strongly to the surface and verify the Exterio Vital is firmed and cannot be rotated.

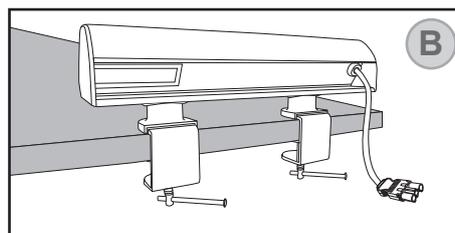

the Exterio Vital is ready for use.

Optional installation Surface mount with Tripods: note: Tripods are not included in the standard kit.

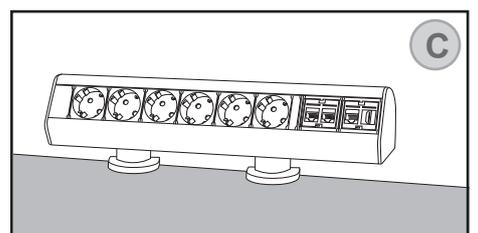

For ordering the Exterio Vital with tripods ,extra cost will be required and you will need to inform the distributor in your area ahead.

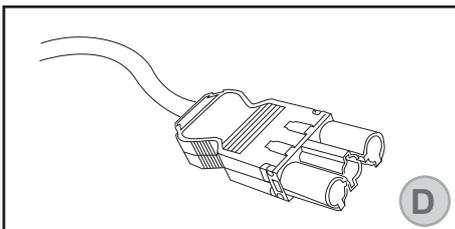

Locate the Exterio Vital on the edge of the desired surface and tight the locking handles of each tripod to the surface by turn them clockwise as in the illustration above.

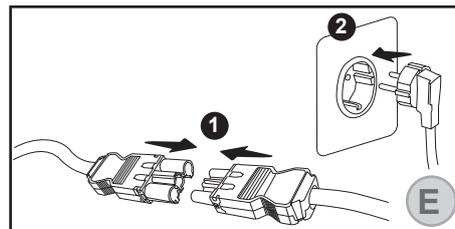

Make sure the locking tripods are tightened strongly to the surface and verify the Exterio Vital is firmed and cannot be rotated.

The Exterio Vital is ready for use.

Connect the GST Male connector to power and the Exterio Vital is ready for use.

REMARK: In case you need to connect the Exterio Vital to a standard socket, you should buy a **starter cable** separately which not included in this Kit and connect it according to illustration above.

Cleaning:

The product can be cleaned by a soft and dry fabric. Please do not use moisture, abrasives materials, solvents or any detergents which can be conductive
